## ARTIFICIAL EYES.

The Art of Making Them Resem-  
ble Their Human Patterns.

**MATCH IN SHAPE AND COLOR.**

They Fit the Eye Socket Perfectly and  
May Even Be Worn During Sleeping  
Hours—Made of Glass, For Which  
No Substitute Has Yet Been Found.

Germany leads all other countries in  
the manufacture of artificial eyes.  
The American consul general at Co-  
burg relates that probably ever since  
the beginning of the world civilized  
people have endeavored to hide or  
remedy any flaw in their appearance,  
such as the loss of an eye would  
cause. How this was done by the va-  
rious nations it is hard to say. Up to  
the present time no discoveries have  
been made that would offer enlighten-  
ment on this subject. There are, it is  
true, a few unauthenticated accounts  
as far back as the middle ages, but  
the first reliable report is given by the  
French surgeon Ambroise Pare in 1590.

Two kinds of artificial eyes were  
known to him, the eklepharos and  
the hypopharos. The eklepharos was  
made by painting the eye and all  
surrounding parts as far as the brows  
on a plate, which was placed in front  
of the eye socket and held in position  
by a string tied over the head. The  
hypopharos was used in a manner  
similar to that of today, being put be-  
hind the eyelid. In the eye socket it-  
self, and was composed of a metal  
shell of copper, silver or gold, covered  
with enamel and glass fusions.

It was only at the close of the eight-  
eenth century that these artificial eyes  
really became of practical use, it being  
then found possible to do away with the  
metal shell altogether and employ  
enamel and glass. The material used  
was a soft lead glass, easily shaped,  
and also easily destructible, and an  
eye had to be renewed every three or  
four months to prevent the socket  
from becoming affected.

It is known that in the middle of the  
nineteenth century eyes were made by  
enamellers in Dresden, Prague, London  
and Stockholm, and in Thuringia. The  
Thuringian makers were not enamel-  
ers, but glassblowers working in con-  
nection with the porcelain painting in-  
dustry, whose endless and untiring  
experiment resulted in the discovery  
of an ideal material, cryolite glass, the  
use of which led to a new technique  
in eye manufacture. Moreover, there  
can now be produced all the charac-  
teristics of the human eye which had  
been possible in enamel work. The new  
prosthesis eye received the name  
"reform eye." To be of value, how-  
ever, it must be made to exactly fit  
the eye socket.

Today it is possible to give to the re-  
form eye any form and color desired,  
and in most cases it can be even worn  
at night, thereby preventing the lid  
from sinking into the socket and the  
lashes from sticking together. At  
times attempts have been made to re-  
place the breakable glass by vulcanite  
or celluloid, but such efforts have long  
since been given up as useless.

In 1852 the method used in France  
for making eyes was as follows: On  
the broadly pressed end of a small,  
colorless, transparent rod of enamel  
the pupil was first made, and the iris  
was then formed on this by means of  
a small, thin pointed, colored enamel  
rod, the designing of the iris being  
made possible by melting the point of  
this rod.

In Paris the good eyes are now so  
made. A glass tube, closed at one end  
and of the color of the sclerotic, is  
next blown into the form of an oval,  
and in the middle of this a hole is  
melted, the edges of which are round-  
ed off evenly and pressed a little out-  
ward. The iris is then placed in this  
opening and well melted in. A thick  
coating of glass remains behind. The  
eye is rounded off, the projecting rim  
of the white coat is smoothed with a  
metal rod, and this coat is thereby  
joined to the sclerotic. By means of a  
thin, pointed red rod the blood vessels  
to be seen on the hard coat of the  
human eye are then melted in. The  
superficial back part of the eyeball is  
melted off, thereby giving to the eye  
the desired form. The eye is finally  
placed on hot sand, where it becomes  
gradually cooled off.

Glass eyes are made in quite a dif-  
ferent manner in Lauscha, the center  
of this industry in Germany, where  
their manufacture is altogether a  
house industry. The eyes are usually  
made by one member of a family, and  
the art is handed down from one gen-  
eration to another. A gas flame is  
used for melting the glass. A small  
drop of white glass is put on the white  
blown ball from which the sclerotic is  
to be made and is then blown so as to  
make a circle about eight millimeters  
(0.315 inch) in diameter. On this cir-  
cle the structure of the iris is built by  
means of various colored glass rods.  
A drop of black glass makes the pupil.  
Over the finished iris crystal glass is  
melted in order to imitate the cornea.  
The further manufacture is similar to  
that given in the first description.

**Flannagan's Way.**  
Cassidy-Flannagan's thinking of go-  
ing into the haulin' business. He  
bought a fine new cart today. Casey  
—But sure he has no horse. Flannagan  
—No, but he's goin' to buy wan.  
Casey—Well, that's lakie Flannagan.  
He always did git the cart before the  
horse.—Philadelphia Ledger.

It is a very great thing for us to do  
the very best we can do just where  
and as we are.—Babcock.

## About the State

Nine-year-old Fred Patch of Jeffers-  
ville died recently as the result of  
a kick from a horse two weeks before.  
Lockjaw set in, followed by convul-  
sions.

Harry Chase, who has been the Ben-  
nington county game warden since De-  
cember, 1905, has resigned, and the vacan-  
cy has been filled by the appoint-  
ment of Edward S. Higgins.

Fire destroyed the finishing shop of  
the New England State company in  
Fair Haven early last Thursday morn-  
ing. The building was of wood, 40 by  
24 feet, owned by Coleman & Vescotti  
and was valued at \$500. The loss was  
partly covered by insurance.

When Gov. John A. Mearns went to  
White River Junction to make the  
Memorial day address it was at the  
personal solicitation of ex-Gov. Samuel  
E. Pingree and after Gov. Mearns had  
declined several similar invitations. He  
would accept no compensation for his  
six by four feet automobile. Even  
this small piece of property was a  
gift from the people of the state.

A young buck deer was found alive  
in the water at Gould's Mills in Spring  
field a few days ago. The game warden  
succeeded in getting the animal out  
and took it to the village, where it  
was examined by a doctor, who found  
that one hip was broken. It had been  
injured earlier in the spring, evidently,  
and had lost the use of its leg in such  
a way that it was obliged to walk on  
the humped foreleg, so that it was prac-  
tically three-legged. The deer was in  
poor condition, showing that foraging  
in the woods had not been very good  
this spring. When it was found that  
the leg was in such a bad condition,  
and that it was suffering from a broken  
hip, the deer was killed and the carcass  
buried in accordance with the orders of  
the game warden.

**DROWNED WHILE SWIMMING.**

Lawrence Sedgell of Windsor Probably  
Seized With Cramps.

Windsor, June 12.—Lawrence Sedgell,  
aged 22, was drowned here Saturday  
while swimming with three companions,  
John Bartlett, Henry Weld and Burnap  
Southworth.

The four men started from the toll  
bridge to the Boston & Maine railroad  
bridge, both of which span the Con-  
necticut river. They became separated,  
Southworth and Sedgell being in the  
rear, when about midway between the  
bridges Sedgell was seized with cramps  
and Southworth shouted for help.

Before the other two men could get  
there Southworth and Sedgell sank to  
the bottom twice. The last time only  
Southworth coming up. As soon as a  
boat could be procured a search for the  
body was made and it was found in  
ten feet of water. Martin and Ed. Dul-  
ling of the rescuing party dived and  
brought the body to the surface.

Sedgell was employed at the Hillsdale  
creamery, of which his brother, Harry,  
is superintendent. He is survived by a  
wife and by a father and mother, who  
live in Lancaster, N. H.

## ILLICIT DIAMOND BUYING.

Dodges the Traders Worked in Kim-  
berley's Early Days.

There are as many stories of I. D. B.  
—I. e., illicit diamond buying—in South  
Africa as there were of smuggling in  
England a century ago. Louis Cohen  
tells of some of the dodges in his  
"Reminiscences" of Kimberley's early  
days. "Dogs were enlisted in the traf-  
fic and used as carriers. Often the poor  
animals were first kept without food  
until they were on the verge of star-  
vation and then given lumps of meat  
containing diamonds, which they bolted.  
Safely arrived at Christiansburg, across  
the Vaal river, the faithful dumb friends  
of man were immediately rewarded for  
their services by having their stomachs  
ripped up and the imbedded baubles  
taken out. Horses, too, were utilized,  
being fed with balls of meat containing  
diamonds and driven across the river under  
the noses of the police. Carrier pigeons  
were requisitioned to fly through the  
air with the greatest of ease laden with  
the brigands' booty. Hollowed heels  
inclosing diamonds sealed down with  
wax were also expedients em-  
ployed with decided and profitable suc-  
cess."

One lady had an ingenious way of  
getting out of a scrape. She was cook-  
ing dinner when a Cape boy knocked  
at the door and sold a forty carat  
diamond to her husband. "It was a trap,"  
a detective immediately rushed in to  
arrest the buyer, searched the house,  
but no diamond could be found. In the  
stuffing of a goose she was bastion-  
ing.

**The Use of Esquire.**  
The recovery of a letter which had  
been sent to a little town in Germany  
and never delivered to the person ad-  
dressed caused the writer of the cus-  
tom of adding "esquire" to a name  
on the subscription of mail matter.  
The letter in question would probably  
have been promptly delivered had the  
address read simply "Mr. John Brown."  
But the sender had addressed it  
"John Brown Esquire," and the com-  
munication rested comfortably in the  
"B" compartment of the postal res-  
tante department, waiting to be called  
for by "Mr. Esquire." One of the popu-  
lar guide books warns against the use  
of "Esq." saying that it might be  
mistaken for a name.

**Art and Nature.**  
Art is the revelation of man, and  
not merely that, but likewise the re-  
velation of nature speaking through man.  
Art pre-exists in nature, and nature is  
reproduced in art. As vapors from the  
ocean floating landward and dis-  
solved in rain are carried back to  
rivers to the ocean, so thoughts and  
the semblances of things that fall upon  
the soul of man in showers flow out  
again in living streams of art and lose  
themselves in the great ocean, which  
is nature. Art and nature are not  
then, discordant, but ever harmonious-  
ly working in each other.—Longfel-  
low's "Hyperion."

## BOY TAUGHT HIS FATHER.

South Carolina Lad Raised 84 Bushels;  
Old Method Yielded Nine.

In South Carolina there was a lad  
who was aroused to a pitch of un-  
quenchable ambition by reading of the  
success of the boys in the state who  
had won prizes and distinction in the  
corn contest writes Forrest Crissey in  
Success. He was unwilling to admit  
that he could be "beaten out" by any  
boy when it came to raising corn, for  
he had the farm spirit strong within  
him. His father evidently considered  
the contest as something of a joke, as  
least so far as the winning chances of  
his own boy were concerned. Finally,  
in sheer self-defense against the boy's  
persistent appeals, he told him that  
he might have the use of an acre of stump  
land on the strict understanding that  
the stumping of after work should not  
involve the outlay of so much as a  
quarter of a dollar.

Day after day the boy toiled at the  
heavy task of stump digging. When  
at last he had cleared all or nearly all  
the stumps from the measured acre, the  
father incidentally remarked that he  
would simply have to have that cleared  
acre of ground, and if the boy was still  
determined to try a contest acre, he  
would have to clear the stumps from  
another piece of land for that purpose.  
Even this cruel stroke in injustice did not  
dishearten the lad. He took the spade  
and pickaxe and tackled the stumps on  
another acre. Although the boy's legs  
often flagged in the course of the toil  
which he put into his contest acre his  
spirit never did. His work of cultivation  
was as persistent as his appeals to  
his father had been at the outset.

The week of October 1 this corn crop  
was officially measured and attested.  
The yield was 84 bushels, while his  
father's corn, which adjoined the con-  
test acre on three sides, made a yield  
of only nine bushels. Here was proof  
against which even the father's stub-  
bornness could not hold out. He is  
now telling his neighbors: I wish  
I'd only known 20 years ago what that  
boy has proved to me about raising  
corn; to-day I would not be about as  
poor and as naked as a toad!

**Characteristics of Granite.**

The specific gravity of granite ranges  
from 2.693 to 2.731, with an average of  
2.693—that is, it is 2.693 times as heavy  
as an equal volume of water. A cubic  
foot of such granite will weigh 166.4  
pounds. The strength of granite is very  
great. It will ordinarily withstand a  
pressure of 12,000 to 34,000 pounds to  
the square inch. Certain Wisconsin  
granites have withstood crushing up to  
a pressure of 43,750 pounds to the square  
inch.

Granite is usually considered an im-  
permeable stone, yet it will absorb con-  
siderable moisture and a cubic yard of  
granite will usually contain about 3.5  
gallons of water. Many granites contain  
4 or 5 per cent. of potash, which is, how-  
ever, in insoluble form.

From "Granitics" of the Southeastern  
Atlantic States," United States geologi-  
cal survey bulletin 626.]

## SOUTH BARRE.

**J. E. PERKY,** sioners.

## KEEPS THE BODY SWEET.

In warm weather many, and especial-  
ly fleshy persons, find it impossible to  
prevent the odor of perspiration. But  
by dusting the body, limbs and feet  
with Comfort Powder after the daily  
bath, and applying it freely under the  
arms and in the folds of flesh, they can  
not only keep the body sweet but add  
greatly to their comfort. This checks  
perspiration and prevents all chafing.  
Mrs. A. C. Howe, a trained nurse, Al-  
bion, Mass., always advises this use of  
Comfort Powder. See that E. S. Sykes'  
name is on the box.

## A Charming Woman

is one who is lovely in face, form, mind  
and temper. But it's hard for a woman  
to be charming by being nervous,  
weak, sickly, irritable, constipated and  
poisoned. But Electric Bitters always pro-  
vide a godsend to women who want health,  
beauty and friends. They regulate  
stomach liver and kidneys purify the  
blood; give strong nerves bright eyes,  
pure breath, smooth, velvety skin, love-  
ly complexion and perfect health. Try  
them. 50c at Red Cross Pharmacy.

## WEBSTERVILLE.

Twenty-five per cent. discount on all  
boys' suits for this week. Lamorey  
Clothing Co., Barre, Vt.

## FOUR LINES FOR 25 CENTS

See Times and publish Wants, Lost and  
Found, For Sale, To Let, etc.—short adver-  
tisements at the rate of four lines for twenty-five  
cents for the first insertion and one cent for  
each subsequent insertion.

## REAL ESTATE FOR SALE.

**FOR SALE.**  
Cottage house of seven rooms, four rooms on  
first floor besides bath, roof made of large  
wood shingles. All finished in the wood. Three  
sleeping rooms on the second floor, large closet  
with each, and a large store room. Stairs go  
up from front hall and also a back stairs. City  
water and connected with sewer. Plaster on  
inside walls. House is in first-class shape,  
being recently repapered. Cellar is made of split  
granite and is always perfectly dry. Lot is 100  
by 110 feet, almost level, and is a good place  
for another house, extra land being used for a  
large garden. Lot of small fruit trees and a  
number of nice shade trees. The house is only  
about five minutes' walk from the post office in  
the City of Barre. For price and terms call at  
the Barre Real Estate Agency, No. 3 Gordon  
Block, Barre, Vt., G. L. Morris, Manager. 741c

**FOR SALE.**—An 8-room house at 11 Merchant  
Street; bath, two closets, city and well water;  
connected with sewer; electric lights; ben-  
ches. Large lot, five rods by eight rods, with  
nice fruit trees. For further information ap-  
ply to place. 740c

**FOR SALE.**—Cottage at Woodbury Pond, all  
furnished up to date; two boats. Will sell  
cheap. For price and terms apply to real estate  
agent, call at the Barre Real Estate Agency,  
Room 3, Gordon Block, Barre, Vt. 671c

**WHEN YOU BUILD A HOME,** select a lot  
in a central and desirable location, where  
you will be able to get to your work easily, and  
the house costs no more in a desirable locality.  
I have lots well located on Ayers, Kirkland,  
Tremont (near East), Hill, Lee and other  
desirable streets. Will make the price right.

## FARM FOR SALE

One hundred acres; good house; three barns  
and a new house. Running water. The farm will  
keep about 25 cows and team. Two miles  
from Marshfield village, on the main road to  
Danville. Near school. About fifty acres of  
timber, about forty of it is meadow. The farm  
will cut fifty tons of hay, besides other crops.  
This is one of our best bargains. The price is  
only \$2000.00. Inquire at the F. B. Cate Real  
Estate Agency, Barre, Vt. New England and  
People's Telephone Lines. 471c

**FOR SALE.**—A modern cottage, built recently  
for a home. This place has six large, airy  
rooms and a bath. It is finished in oak and  
flashed in ash and birch; double plastered  
walls; hot air furnace stands on a large  
corner lot, splendid view and garden. It is  
electrically wired. If you are looking for a com-  
fortable home, in nice location, call at No. 10 West  
Patterson street, corner of Orange street. 741c

**FOR SALE.**—A six-room cottage, nearly new,  
good barn, and three acres of nice land, located  
on Trow Hill, Spring water and a good view.  
This is a very desirable place for anyone  
who wants to live just outside the city and  
keep a horse and buggy. Might exchange for a cottage located  
in the city. Inquire at the F. B. Cate Real  
Estate Agency, Barre, Vt. 391c

**FOR SALE OR LEASE.**—Quarry land in  
Websterville. Inquire of Mrs. M. M. Paine,  
Websterville. 371c
